SOUND LIGHTING VIDEO

Up-Lighting & LED Up-Lighting

Our resources enable us to expertly illuminate any room or event. We can customize anything to set the mood you desire. Lighting of centerpieces, artwork, ice sculptures, cakes and more. Beautifully match your style, theme or the desired feel you're looking to achieve.

LED style lights, are also "intelligent" meaning they can be synchronized together and even computer programmed to change colors simultaneously, patterns or effects. Your up-lighting arrangement will be pre-planned, professionally designed, and customized for your specific event based on room arrangement.

Up-lighting can be placed on the floor to shine up columns, up walls or behind trees and other props to give that extra appeal to make an ordinary banquet room come to life! Let our design team work with you to create the look and feel your guests will marvel at!

The possibilities are unlimited!
